

August 5, 2009

Dear Antioch Resident:

"ADVANCE NOTIFICATION OF ROAD WORK"

In an effort to improve and extend the life of the roads in Antioch, the City has scheduled a slurry seal project on the road adjacent to your house. The actual work for this project should be completed in one day.

Slurry seal is a combination of liquid oil and crushed fine rock that will create a new, cost effective wear surface for your road. However, your cooperation is needed to make this project a success. We ask that you do not wash your car, or water your lawn on the date the slurry seal work is **scheduled** for your street (**see over**). We also ask that you do not drive on the freshly sealed street until the traffic control at the end of the road has been picked up. **Driving through the fresh oil may damage your car, as well as the street. Your road will be CLOSED for approximately five hours.** The average cure time for this process is 4-5 hours.

This project will affect garbage service if this is your pick up day. Please make sure your garbage containers are placed at the curb the night before. Arrangements have been made for garbage to be picked up early on your scheduled pick up day. City crews will place the empty cans on the sidewalk.

For your convenience "NO PARKING" signs will be posted 24 hours in advance of the beginning of work to allow you to make alternative parking arrangements.

The road will be swept after all slurry seal work in your neighborhood is complete. Signs will be posted at the end of your street prior to sweeping.

Thank you for your cooperation and patience during this project. If you have any questions regarding this project, please call the City of Antioch Public Works Department at (925) 779-6950.

Very truly yours,

Ron Bernal
Director of Public Works
